Professional Profile

Software developer with over 7 years of experience in web applications.

Specialized:

- JavaScript | React | Node.js
- SQL/NoSQL databases
- Serverless architectures

My goal is to provide innovative solutions that improve efficiency and user experience, while continuing to develop my skills.

Work Experience

****Andonix** | Full Stack Developer**

Sep 2019 - Jul 2024

🚀 ****Key Achievements:****

- **Backend optimization:** Refactoring of lambdas, improving performance and scalability.
- **Frontend Development:** Implementation of reusable React components, reducing development time by 30% and initial loading time by 25%.
- **Data Integration:** Refactoring of functions for data replication in Power BI and Google Looker Studio, enhancing data analysis flow.

****Sección Amarilla** | Full Stack Developer**

Jul 2017 - Sep 2019

🚀 ****Key Achievements:****

- **My Negocio:** As the lead developer, I updated and improved processes for this platform and ensured the delivery of new features with high quality and within established deadlines.
- **Frontend Development:** Creation of a "Do it yourself" project for Sección Amarilla users to create their own websites.
- **Openpay:** Creation of payment process with Openpay platform.

****Grupo Salinas** | Backend Developer**

Feb 2016 - May 2017

****Responsibilities:****

- **Backend:** Maintenance, updating, processing, and improvement of data flow for the information collection system and business portfolio of Grupo Salinas.
